

## R2-METROe-BT – Bluetooth Kit for METRO Repeater

### Description:

The R2-METROe-BT Kit provides the control of a METRO repeater device via Bluetooth.

The METRO can be controlled and configured via serial interface by PC or Notebook. The included Bluetooth-to-Serial adapter provides a convenient method for remote control of the repeater device.

The kit includes all necessary components and comes with a simply to use software that was specifically designed for this application.

This comes in handy especially at difficult to access METRO repeaters where manually control is no option (e.g. at aircraft hangars or above suspended ceilings).

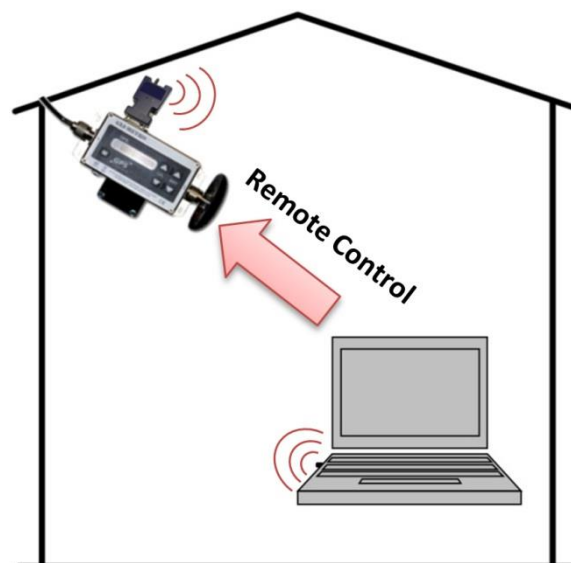

Simplify your repeater controlling and create yourself new possibilities!

R2-METROe-BT Kit
